

## 2. KUDIRAIVALI – CO (KV) 2

### Special features

- Higher yield
- Short duration
- Drought tolerant
- Non-lodging
- Highly suitable for value addition

**Parentage** : Pure line selection from genetic accession EF 79

**Duration** : 95 days

**Season** : Kharif and Rabi

**Yield** : 2114 kg/ha  
(23.2, 10.6 and 15.6% increase grain yield over checks CO 1, K 1 and VL 29 respectively)

**Highest yield obtained** : 3095 kg/ha

**Area of adoption** : Madurai, Ramnad, Tuticorin and Virudunagar districts

### Scientists responsible for release

- Dr.A.Nimalakumari, Dr.A.Subramanian, Dr.P.Sumathi, Dr.N.Senthil, Dr.N.Kumaravadivi, Dr.A.John Joel, Dr.K.Mohanasundaram, Dr.T.S.Raveendran, Dr.A.R.Muthiah, Dr.T.Raguchander and Dr.S.Manoharan
