

Case Study of Export Trader Potato

Name: Chandru
State: Tamil Nadu
Address:
228, Chellamal Colony,
3rd street, Gandhi Nagar. PO
Tirupur. 641 603
Mobile: 099449 66671

My name is **Chandru**. My qualification is Diplamo in Fashion Designing NIFT having 1 year of experience in Exporting Potato to Malaysia. Exporting Potato is our main profession. I saw ur Analyst name [www.indg.in/india/market_information Portal](http://www.indg.in/india/market_information). I called over phone he explains all the ongoing activities of the Directorate of Extension Education, TNAU, Cbe. And I came to know that DMI is the collaborative project run by TNAU (Tamil Nadu Agricultural University), Coimbatore & C-DAC (Centre for Development of Advanced Computing), Hyderabad. At present DMI contains 13 major markets functioning in and around Tamil Nadu. From the selected market, the analysts have to collect the price structure for each and every commodity and they have to update the information in the INDG website. The updated information is available in the INDG website called www.indg.in/india/market_information and TNAU website called www.tnau.ac.in. The uploaded market information is also sent in the form of text message to the mobile number of each and every farmer. The SMS data's are available with two markets. This helps to compare the price of two near markets. So the farmers can sell their produce at a place where he will fetch a very high profit.

This is the first time in my lifetime I heard this kind of website running for farmers. With the help of the market analyst, now I have enrolled myself in DMI to get Potato prices for Cochin and Mettupalayam markets. I have enrolled for ur SMS service for two markets Cochin and Mettupalayam markets for potato.

I request all the farmers to enroll their mobile number in the DMI service. This helps us to sell the harvested produces to suitable market to fetch premium price for your hard work. My Sincere thanks to all the official staffs who working behind the DMI.
