Agromet advisories in relation to the anticipated weather having moderate cloud cover and moderate humidity

Crop/ Farming	Stage /	Advisories	
system	Activities		
Guava	Fruiting stage	As moderate cloud cover and light rainfall is expected in the	
		coming days, fruit fly incidence is noticed in guava. For	
		controlling this pest spray Quinalphos 25 EC or Malathion	
		50 EC @ 1 ml/lit four times at 15 days interval.	
Mango	Fruiting stage	As moderate cloud cover and light rainfall is expected in the	
		coming days, fruit fly incidence is noticed in mango. For	
		controlling this pest plough the interrow space to expose	
		pupae. Prepare bait with methyl eugenol 1% solution mixed	
		with malathion @ 2.0 ml/ lit. Take 10 ml of this mixture per	
		trap and keep them in 25 different places in one hectare	
		between 6 am to 8 am. Collect and destroy the fallen fruits.	
		Spray neem oil @ 3.0 ml as need based.	

Banana and	Flowering stage	As winds with more speed are expected in the coming days
Sugarcane	Grand growth	give stake for banana and do propping for sugarcane to prevent the crops from damage.
	stage	

SMS: No rain. Guava- control for fruit fly- spray Quinalphos 25 EC or Malathion 50 EC @ 1 ml/lit 4 times at 15 days interval.
