V-H- Vegetative & Harvest; P- Early season planting; V- P- Vegetative & Picking; H-N-T- Harvest, Nursery & Transplanting; M- Maturity

Agro Advisory

- ✓ Considering the first two days of dry spell, nursery for Kar season rice may be prepared and sown with pre-germinated seeds. In the third day evening from the sowing, impound water in the nursery against damage with the anticipated rainfall.
- ✓ Considering the anticipated rainfall from 17th to 19th June, hand weeding and hoeing may be given to irrigated 30 days old turmeric.
- ✓ In irrigated sorghum and bajra of 60 days old may be given irrigation considering the critical period of flowering and milking since drizzling will be expected on the last three days.
- ✓ Considering the high morning and evening relative humidity and also high wind speed, animals and poultry may be given enough drinking water
- ✓ Since the wind speed is more than 17 KMPH, propping may be given to five months and old banana.

SMS advisory

- ✓ Since the wind speed is more than 17 KMPH, propping may be given to five months and old banana.
