**SMS Advisory:**

Light rain may occur during the next five days over certain spots

**Weather Based Agro-Advisories**

**Imp. Crops: Paddy, Vegetables and Pulses**

- To control the brown spot disease in paddy, it is recommended to spray 5gm of pseudomonus per litre of water or 2.5gms of dithane M45 per 10 litres of water.
- Stem borer incidence is noticed in paddy crop. During prevailing weather slight rain is expecting farmers are advised to apply granular form of pesticides cartap hydrochloride (4G).
- During prevailing slight cloudy weather there may be incidence of sucking pests in vegetable crops, to control this, spray Imidachloprid 100 ml/ha. or It is recommended to use, 'Yellow Sticky trap' - 10 traps per acre.
- Due to moderate humid conditions mastitis disease may affect the milch animals. Clean the udder with 1% potassium permanganate solution, before and after milking.
