Agro Advisory

- ✓ Utilizing the receipt of anticipated summer rainfall during next two days, summer ploughing may be done in dryland and irrigated fallow land.
- ✓ Squally wind with thunder rain may cause lodging in banana and sugarcane of above 5 months. Propping in sugarcane and stacking in banana crop is advised.
- ✓ Prevailing weather is favourable for the mite attack in vegetables. Hence, monitor the crop and if needed spray Dicofol @ 2.5 ml per liter of water
- ✓ By utilizing the summer rainfall, sowing of irrigated sorghum may be taken in the ploughed area.

SMS advisory

- ✓ By utilizing the summer rainfall, sowing of irrigated sorghum may be taken in the ploughed area.
