**Weather Based Agro-Advisories : ( Important Crops : Paddy & Pulse )**

Prevailing current weather the incense of Thrips in paddy .Paddy leaf shows discoloration and rolling, Yellow (or) silvery streaks on the leaves of young seedlings, Terminal rolling and drying of leaves from tip to base, It causes damage both in nursery and main field, Leaf tips wither off when severely infested, Unfilled grains at panicle stage . To control **ETL**: 60 numbers in 12 passes or rolling of the first and second leaves in 10% of seedlings and spray Phosphamidon 40 SL 50 ml.

Due to current situation the weed management is vital in Groundnut cultivation, Pre-sowing of Groundnut Fluchloralin at 2.0 l/ha soil applied and incorporated followed by light irrigation. And Pre-emergence of Groundnut Fluchloralin 2.0 l/ha or Pendimethalin @ 3.3l/ha applied on third day after sowing through flat fan nozzle with 500 l of water/ha followed by irrigation.

Prevailing weather condition the incense of Enterotoxaemia in Goat. The mail symptoms of the disease causes sudden death in young growing kids. Mucous diarrhea may also seen during death . To prevent and control this disease Don't feed on young grass, .allow the goat for grazing after 1 hour of sunshine & vaccinate the animals once in a year before the onset of monsoon..
