Morning relative humidity is expected to be around 75 percent and evening relative humidity is expected to be around 55 percent. Average wind speed is expected to be around 4-6 km per hour and the wind direction will be north east.

Agro Advisory

Crop	Stage	Advisory
Rice		By using the current dry weather condition, harvested paddy seeds may be dried to 13% moisture content to prevent pest damage in storage.

Blackgram		Treat the black gram seeds with carbendazim 2g/1kg before sowing, to prevent disease incidence.
Pulses		In rice fallow pulses, flea beetle infestation is being noticed. To control this malathian dust 4 D can be applied @ 10 kg/ac during morning hours using rotary duster.
Cattle	Cow	Due to drop in night temperature, the livestock particularly the young ones should not be left in open. A proper night shelter with sufficient heating equipments (lighting bulb) must be provided to prevent the incidence of pneumonia.

SMS advisory

- By using the current dry weather condition, harvested paddy seeds may be dried to 13% moisture content to prevent pest damage in storage.
