Agro Advisory

Crop	Stage	Advisory
General		Dry days or drizzling alone expected with wind speed of 4 - 6 km/hr is expected in western zone during next five days. Irrigation may be provided based on soil moisture. Fertilizer application and pesticide spraying may be done during non rainy hours.
Rice	Vegetative	Yellow stem borer incidence and leaf folder damage are observed in western ghat districts. Spray Fipronil 80% WG 50 g/ha is recommended for the management of both pests. Prevailing high relative humidity is favourable for bacterial leaf blight in rice. Application of copper hydroxide 77 WP @ 1.25 kg/ha or streptomycin sulphate + tetracycline combination @ 300 g + copper oxychloride @ 1.25 kg/ha should be carried out. Present Samba rice is at tillering stage, hence apply 38 Kg N / ha as top dressing.
Maize	Vegetative	By utilizing the rainfall top dressing of 68 kg nitrogen/ ha can be done in irrigated maize of 25 days old.
Pulses	Vegetative	Standing green gram and black gram under irrigated condition would grow with tendrils as a result of excess soil moisture. Clip the tendrils or top the crop.

~	T	
Cotton	Vegetative and flowering	Cotton may get affected with reddening disease due to continuous rainfall till last week. By utilizing the dry spell, spray mixed solution of 5% Magnesium sulphate + urea 1% + zinc sulphate 0.1% at 50 th and 80 th days of sowing.
		Considering the dry weather, apply 40 Kg N + 40Kg K2O/ha for irrigated winter Combodia cotton followed by earthing up.
Gourds	Flowering	Prevailing continues rainfall is also favourable for the vegetative growth in gourds at the time flowering. Hence to get more flowers and fruit set application of ethrel @ 100ppm for all gourds expect ribbed gourd where 200ppm is recommended. Two spray may be scheduled at week interval.
Mango		Due to continuous rain till last week, mango tree may put higher vegetative growth and hence spray 1% Potassium nitrate or Paclobutrazol @10gm a. i per tree
Banana		Due to past weather, there is incidence of Sigatoka leaf spot disease in banana. Spray either Carbendazin @ 1 g/lit or Manocozeb @ 2g/lit along with teepol @ 0.5 ml after thorough mixing.
Turmeric		Prevailing weather condition is also favourable for blotch disease in turmeric. Hence farmers are requested to monitor the crop carefully & if necessary, spray Azoxystropin @ 1ml / liter of water.
Animal		The chance of occurrence of foot and mouth disease in cattle during rainy season is more and therefore vaccination against the disease is warranted.
		Prevent animal from drinking of stagnated rain water against food contamination. Provide clean and good drinking water to animals.

SMS advisory

➤ Higher vegetative growth in mango due to continuous rain till last week may be arrested by spraying 1% Potassium nitrate.
