Agro Advisory

Crop	Stage	Advisory
General		Drizzling to light rainfall alone is expected with wind speed of 6 - 8 km/hr is expected in western zone during next five days. Minimum temperature is getting decreased to 20°C. Irrigation may be provided based on soil moisture. Fertilizer application and pesticide spraying may be done during non rainy hours.
Rice	Vegetative	Prevailing high relative humidity is favourable for bacterial leaf blight in rice. Application of copper hydroxide 77 WP @ 1.25 kg/ha or streptomycin sulphate + tetracycline combination @ 300 g + copper oxychloride @ 1.25 kg/ha should be carried out. Present Samba rice is at tillering stage, hence apply 38 Kg N / ha as top dressing by using drizzling rainfall
Cotton	Vegetative and flowering	Cotton may get affected with reddening disease due to continuous rainfall till last week. By utilizing the dry spell, spray mixed solution of 5% Magnesium sulphate + urea 1% + zinc sulphate 0.1% at 50 th and 80 th days of sowing. Considering the drizzling weather, apply 40 Kg N + 40Kg K ₂ O/ha for irrigated winter Combodia cotton followed by earthing up.
Gourds	Flowering	Prevailing continues rainfall is also favourable for the vegetative growth in gourds at the time flowering. Hence to get more flowers and fruit set, application of ethrel @ 100ppm for all gourds expect ribbed gourd where 200ppm is recommended. Two spray may be scheduled at weekly interval.

Grapes		Prevailing weather is favourable for the downy mildew incidence in grapes and therefore farmers are requested to monitor the crop carefully and spray 1% Bordeaux mixture if needed.
Mango		Due to continuous rain till last week, mango tree may put higher vegetative growth and hence spray 1% Potassium nitrate or Paclobutrazol @10gm a. i per tree
Banana		Due to past weather, there is incidence of Sigatoka leaf spot disease in banana. Spray either Carbendazin @ 1 g/lit or Mancozeb @ 2g/lit along with teepol @ 0.5 ml after thorough mixing.
Turmeric		Prevailing weather condition is also favourable for blotch disease in turmeric. Hence farmers are requested to monitor the crop carefully & if necessary, spray Azoxystrobin @ 1ml / liter of water.
Animal		<p>The chance of occurrence of foot and mouth disease in cattle during rainy season is more and therefore vaccination against the disease is warranted.</p> <p>Since rainfall is expected drainage in and around cattle and poultry sheds may be provided to avoid water stagnation. Further farmers are requested to safeguard the feed and fodder material from rain soaking.</p> <p>Animals may thirst for water due to low temperature and high humidity. Provide clean and good drinking water to animals.</p>

SMS advisory

- Animals may thirst for water due to low temperature and high humidity. Provide clean and good drinking water to animals.
