02-10-2022	1	1	1	1	1	1	0	1	1	1	1	1	0

### Agro advisory

Crop	Stage	Advisory
General		<p>Light rainfall is expected in western zone during next five days. Irrigation may be provided based on the soil moisture.</p> <p>By utilizing the light rainfall, land preparation may be initiated in rainfed black soil towards pre monsoon sowing.</p> <p>Since only light drizzling is expected in forth coming days, sorghum/ millets and groundnut may be harvested and sun dried.</p>
Cotton	Sowing	<p>Due to high soil moisture and relative humidity, flower shedding in cotton crop can be arrested by spraying NAA 40 PPM in 60 - 90 days after sowing. (40 mg of NAA dissolved in 1 liter of water will give the concentration of 40 PPM). To arrest the terminal growth nipping the terminal portion of the main stem beyond the 15<sup>th</sup> node.</p>
Sugarcane		<p>Provide propping for early season and midseason planted canes against lodging with heavy wind anticipated in Coimbatore district.</p> <p>Considering the anticipated drizzling, second top dressing with 85 kg Urea + 25 kg Potash / acre may be given to late season planted cane, followed by earthing up.</p>

Tomato	Planting	Leaf minor is observed in Tomato due to prevailing weather. To control spray 5 per cent Neem Seed Kernel Extract during non rainy period.
Banana		Expected Wind speed is more than 5-6 km per hour with rainfall, hence five months old banana may be provided with support against lodging. Avoid irrigation.
Coconut		If sufficient moisture is available green manure crop may be sown in Coconut garden to increase the fertility of soils.
Animal		<p>Farmers are advised not to allow their animals to graze near pond or lake areas to avoid fluke infestation.</p> <p>Heavy wind and cloudiness may cause thirst for water in animals. Hence, provide adequate clean drinking water.</p> <p>Season is more favourable foot and mouth disease in animals. Farmers are advised to do Vaccination to the animals in nearby Veterinary hospitals.</p>

### SMS advisory

- If sufficient moisture is available green manure crop may be sown in Coconut garden to increase the fertility of soils.
