According to district level forecast issued by India Meteorological Department for Karur district, the sky will be moderate cloudy. Rainfall is expected on 02.02.2023 to 04.01.2023. Maximum temperature is expected to be around 27 – 29 °C and minimum temperature is expected to be around 20 – 22 °C. Morning relative humidity is expected to be around 80-90 percent and evening relative humidity is expected to be around 50 - 60 percent. Average wind speed is expected to be around 8 - 10 km per hour. The wind direction will be east.

Agro Advisory

Crop	Stage	Advisory
General		Postpone irrigation to all crops.
		Avoid application of fertilizers and insecticides to the crops.
Rice	Harvest	Farmers are advised to harvest matured paddy immediately in order to protect from expected rainfall.
Cattle	Cow and Goat	The prevailing night time temperature is favorable for pneumonia formation in cattle. To reduce the risk, suitable night time shelter with enough heating provision must be given.

SMS advisory

Farmers are advised to harvest matured paddy immediately in order to protect from expected rainfall.
