Morning relative humidity is expected to be around 90 percent and evening relative humidity is expected to be around 50 percent. Average wind speed is expected to be around 4 - 12km per hour. The wind direction will be north east.

Agro Advisory

Crop	Stage	Advisory
General		Provide drainage facilities to waterlogged fields to promote drying of land and rice crop.
Rice	Harvest	Harvest the paddy crop at optimum moisture content during the ensuing dry weather conditions.
Pulses	Sowing	Treat the black gram seeds with <i>Beauveria basiana</i> @10g per kg of seeds before sowing.
Pulses	Sowing	Sow black gram or green gram in rice harvested fields.
Cattle	Cow and Goat	The prevailing night time temperature is favorable for pneumonia formation in cattle. To reduce the risk, suitable nighttime shelter with enough heating provision must be given.

SMS advisory

Farmers are advised to harvest matured paddy at optimum moisture content.
