### Horticulture Specific Advisory:

Horticulture(Varieties)	Horticulture Specific Advisory
TOMATO	The incense of Leaf Curl virus disease is expected in Tomatoes. The symptom appears on newly grown plants, tomato yellow leaf curl virus reduces the internodes, also gives the plant a stunted appearance. The new leaves also greatly reduce in size, wrinkled and yellowed between the veins. Have margins that curl upward, giving them a cup-like appearance. Flowers may appear but usually will drop before fruit set. To control spray the composite of Fermented curd 250ml + Pseudomonas 40gm + 2 egg white with 10 litres of water.
GRAPES	The occurrence of the Mealy bug is expected in Grapes. The symptoms of damage found in fruit. Fruits will drop at a premature stage. Collect and destroy the affected bark, leaves, twigs and stems. Use sticky traps on fruit-bearing shoots. To control this, release exotic predator, Cryptolaemus montrouzieri @ 10 beetles per vine.

### Poultry Specific Advisory:

<b>Poultry(Varieties)</b>	<b>Poultry Specific Advisory</b>
CHICK	During the hot weather conditions, chick rearing farmers can increase the number of water tanks by 20 to 30 percent during summer than the usual days. It helps more chicks to drink more water. To minimize the temperature of water, add some ice cubes in the water bowls. To reduce the dehydration, add more minerals in the water.
