Agromet Advisory Thoothukudi district

Crop	Stage	Crop Specific Advisory
Irrigated crops	Water management	Light rainfall received during previous week and chance for very light rainfall on day 1 to day 5. However, Farmers are requested to irrigate the crop based on the crop requirement and local weather.
General	Temperature	Non recording of rainfall area with increase in minimum temperature during preceding week, crop may be undergone stress and increase in maximum temperature in the coming week triggers the pest. So, farmers are requested to spray neem oil once in 15 days as preparatory measures.
Vegetable	Temperature	<input type="checkbox"/> Increase in maximum temperature, chance for increase of sucking pest. farmers were advise to monitor the sucking pest and precaution may be given. Farmers are advised to use the yellow sticky trap @ 10-15/acre to monitor the incidence of sucking pests and Blue sticky trap @ 5-10/acre to monitor the Aphids and leaf miner. <input type="checkbox"/> If rainfall occurrence was not noticed avoid spray.
Jasmine	Flowering stage	Prevailing weather is conducive for Blossom midge. Spray Thiamethoxam 2.5% WG @ 0.75 g/litre (or) Novaluron 3ml/lit. of water.
Chilli	Fruiting stage	<input type="checkbox"/> Very light rainfall is predicted, farmers are requested to harvest the fruit to avoid fungal infestation during storage. <input type="checkbox"/> if rainfall occurrence is noticed, responsible for spread of Anthracnose. Chemicals like wettable sulphur 0.2%, copper oxychloride 0.25% and Zineb 0.15% not only reduced the disease incidence but also increased the yield of fruits. Spraying of Essential oil - Nigella sativa - antimicrobial activity. <input type="checkbox"/> High Temperature is conducive for Gram caterpillar @ Emamectin benzoate 5 % SG @ 4 g/10 lit.
Coconut	All stages	All stages- Rugose Spiralling whitefly is noticed in the prevailed weather condition. Application of water, maida solution as spray in order to increase the population of Encarsia parasitic. Also keep yellow stick trap.
Livestock	Goat	Deworm the non-pregnant animals with liquid oxychloxamide @ 5mg/kg of body weight. Vaccinate against P.P.R and enterotoxemia. If nasal discharge and cold administer Bolus sulphadimidine 5 gram per adult animal, half of bolus per young animals.
	Milch animals	Maximum temperature results to rise in body temperature, increased pulse rate, increased peripheral blood flow, reduced feed intake, and increased water intake. Measures like Thatching the roof with materials like paddy straw etc, painting the roof with white paint or, providing a false ceiling insulation will help provide a cooler environment. Create barriers against hot wind using thatched wall or wet gunny cloth/ gunny bags. Ensure increased mineral supplementation during hot weather to meet the increased demand of minerals. Potassium rich mineral mixture should be preferred.

SMS:Rain 08-11.03-1,1,1&1mm Based on rainfall, irrigation may be planned. Vegetable crops- fruit to be harvested to avoid economic loss.

Tamil Nadu		
Next five days	Weather warning	<ul style="list-style-type: none"><input type="checkbox"/> Light / moderate rain is likely to occur at isolated places over South Tamilnaduon Day 1 (08-03-2023) and Day 5 (12-03-2023).<input type="checkbox"/> Light / moderate rain is likely to occur at isolated places over South Tamilnadu, Delta & adjoining districts and Karaikal area on Day 2 (09-03-2023), Day 3 (10-03-2023) and Day 4 (11-03-2023).
