Agro Advisory

Crop	Stage	Advisory
General		<p>Clear sky and dry days with wind speed of 4-8 km/hr is expected in western zone during next five days. Temperature is increasing.</p> <p>Dry days are continued. Provide irrigation based on soil moisture during evening hours and apply mulches to conserve moisture.</p> <p>By utilizing dry weather harvested produce may be dried and stored properly.</p>
Maize	Flowering	As maize crop is most sensitive to moisture stress at 45 to 65 days after sowing, ensure optimum moisture availability by providing irrigation to avoid yield loss at harvest.
Sugarcane	Vegetative	Since dry weather is continuing, early shoot borer incidence in sugarcane may be increased. Hence farmers are requested to provide frequent irrigation to keep the field wet and do mulching.
Vegetables	Vegetative	Since temperature starts increasing, sucking pest like aphids, Thrips, Leaf Minor and Jassids may increases in Vegetable crops. If needed spray 5% Neem Seed Kernal Extract.
Banana	Planting	Dry wind with 4- 8 km is expected in Western Zone districts. Protect the 5 months and above old Banana from lodging with adequate support.

Animal	<p>Provide clean drinking water to animals and poultry enough to meet the hot dry weather.</p> <p>Considering the rising maximum temperature and high morning relative humidity, it is proposed give Foot and Mouth diseases vaccination to all cattle's and buffalo.</p> <p>Vaccination to the sheep may be done in near be veterinary hospital against the fox disease</p> <p>Considering the temperature rise, milch animals need mineral mixture and hence 50grams of TANUVAS smart mineral mixture per animal per day may be mixed along with animal feed. Since temperature is rising provide enough drinking water.</p> <p>Considering the increasing temperature, artificial insemination to animals may be done in morning before 11am after cooling the animals by bathing.</p>
--------	---

SMS advisory

- Maize crop is most sensitive to moisture stress during flowering. Ensure optimum soil moisture by providing irrigation to avoid yield loss at harvest.
