SMS Advisory	Chances of Moderate rain during 21, 23, 25 Oct & Rather heavy rain on 24 Oct. Maximum temperature would be in the range of 32°C to 33°C and the minimum temperature would be between 22°C - 23°C. Generally cloudy sky will appear for the next five days. Wind expected with the speed of 6-8 Kmph from, East & Southeast directions.
-------------------------	--

General Advisory:

Extended range Forecast for next week (20th – 26th Oct 2023):

Rainfall:

As per extended range predictions, there is possibility of below normal rainfall likely over the district during 20th to 26th October 2023.

Maximum Temperature:

Maximum temperatures is likely to be near normal to slightly above normal and are likely to be in the range 28°C to 32°C over the plains of the district during next week. 20th to 26th October 2023.

Minimum Temperature:

Minimum temperatures are likely to be near normal to above normal and are likely to be in the range 18°C to 24°C over the district during next week 20th to 26th October 2023.

It is expected to receive rainfall in the forthcoming days. Hence the vegetable, fruit, and flower cultivating farmers are requested to carry out top dressing of manure followed by the earth-up operation.

Since Moderate to Rather Heavy rainfall is expected for the next five days, Farmers are advised to act swiftly to repair the water channels, farm ponds and other water bodies to harvest the rain water. During these days farmers are advised to avoid irrigation, intercultural operations and application of plant protection measures to the standing crops, provide adequate drainage facilities in the fields to avoid water stagnation due to heavy rainfall, do not allow the animals to grazing outside, standing near the trees or electric poles & provide safe shelter.

Weather Based Agro-Advisories: (Mango, Cucurbits & Animal Husbandry)

Mango:

The chances of incenses of Grey Blight is expected in Mango. The symptom of damages appears on leaf lamina, leaf margin with brown spot developments. It becomes dark brown and black dots appear on the spots.

Heavy infection is noticed during the high humidity.

Remove and destroy infected plant parts.

To control, spray Copper oxychloride @ 250gm + Azoxystrobin @ 25ml with Sticky agent @ 10ml per 10 litres of water.

Plant protection activities can be done, only on non-rainy days.

Cucurbits:

Due to the prevailing weather the incense of Leaf miner is expected in Cucurbits. These pest attacks the leaves of cucurbits with serpentine mines.

Drying and dropping of leaves due to severe infestation.

To control this, collect and destroy mined leaves and Spray NSKE @ 500 ml per tank.

Animal Husbandry:

Due to the prevailing weather condition, farmers are advised to allow the cattle for grazing only after 2 hrs of sunrise.

Cover the cow shed with gunny bags, keep the floor in dry condition.

Dry feed and greens should be feed without moisture to avoid the fungal infection.
