Agro Advisory

Crop	Stage	Advisory
General		<p>Dry days with clear sky is expected during next week with wind speed of 6-12 km/hr in western zone districts.</p> <p>The temperature may be increased 1-2°C from the normal. Interior districts may get maximum temperature of >39°C.</p> <p>Irrigation may be done based on soil moisture and apply crop residue mulches to all irrigated crops to maintain sufficient soil moisture.</p> <p>In case of limited irrigation water, dust mulch (top layer to a depth of 2-3cm may be stirred well) to avoid moisture stress condition.</p> <p>Rising temperature may bring summer rain during afternoon hours with lightening and thunders. Plan for summer ploughing against the slope with soil inverting type ploughs.</p>
Coconut		<p>Summer rains during next two months may be harvested in root zone of coconut by deepening the tree basin with inward slopes. Till then, ensure to provide 100 liters of water per tree per day to maintain the productivity.</p>
Animal Husbandry		<p>Increasing temperature and decreasing relative humidity may cause discomfort to the animals. Hence, provide clean water to both animals and poultry.</p> <p>Hang wet gunny bags around the animal shed to reduce the temperature. Do not allow animals for grazing during mid day.</p> <p>To avoid the heat stress to animals feed the animal during night or early morning or late evening hours.</p>

SMS advisory

- Provide summer ploughing by utilizing the expected summer rainfall.
