Maximum temperature is expected to be around 28 - 29 °C. Minimum temperature is expected to be around 21 - 22 °C. Morning relative humidity is expected to be around 95 per cent and evening relative humidity is expected to be around 80 per cent. Average wind speed is expected to be around 12 - 14 km per hour and the wind directions will be from north east direction.

### Agro Advisory

<b>General</b>		Postpone irrigation, fertilizer and pesticide application to all crops. Provide adequate drainage facility to cropped fields wherever essential.
		Link the drainage channel with farm ponds towards efficient water drainage besides the rain water storage.
<b>Rice</b>		Drainage facilities should be increased in the waterlogged areas water should be drained out the crop does not get submerged. Nutrient management should also be done according to the stage
		After draining the stagnant water, aerate the soil with a cone weeder or weeder in row planting fields to allow the roots to take up the nutrients from the soil.
<b>Cattle</b>	<b>Cow and Goat</b>	Provide proper shedding facilities to the livestock in elevated places.

### **SMS advisory**

Farmers are advised to provide adequate drainage facilities to all crops due to Light to moderate rainfall forecast.
