Weather Summary and forecast for Karur district

According to district level forecast issued by India Meteorological Department for Karur district, the sky will be moderate cloudy. No rainfall expected coming five days. Maximum temperature is expected to be around 31 – 32 °C and minimum temperature is expected to be around 19 - 21 °C. Morning relative humidity is expected to be around 80 - 90 percent and evening relative humidity is expected to be around 40 percent. Average wind speed is expected to be around 10 – 12 km per hour. The wind direction will be east.

Agro Advisory

Crop	Stage	Advisory
General		Farmers are requested to download and utilize the agricultural based mobile apps suggested by TNAU (TNAU AAS, Meghdoot and DAMINI).
Rice	Harvest	Farmers are advised to properly dry and store the matured Samba paddy which affected during the heavy unusual rainfall.
		In samba paddy field, it is right time to sow the rice fallow pulses. ADT 3, ADT 6 blackgram and ADT 3 green gram varieties are suitable under rice fallow condition.
Coconut	Bearing Stage	To reduce the button shedding under this weather condition, feed the roots with 200 ml of coconut tonic per palm.
Cattle	Cow	Due to cool night temperature, the livestock particularly the young ones should be kept under shelter with heating arrangements to prevent the incidence of pneumonia.

SMS advisory

Farmers are advised to properly dry and store the matured Samba paddy which affected during the heavy unusual rainfall.
