Agro Advisory

Crop	Stage	Advisory
General		Drizzling or light rainfall is expected along with heavy wind
		speeds of 10 – 24 kmph during this week in Western zone districts.
		Irrigation may be done based on soil moisture. Schedule the
		chemical sprays during non rainy and low wind speed hours.
Maize	Sowing	Utilizing the rainfall, irrigated maize sowing may be continued
		with imidacloprid 70 WS seed treatment @ 10g/ Kg of seeds.
Sugarcane	Vegetative	Considering the high wind speed with light rainfall provide
		propping to the sugarcane by tying opposite row to prevent from
		lodging.
Cotton	Sowing	With the receipt of anticipated rainfall land preparation and sowing
		may be initiated for irrigated Combodia cotton and complete
		before August 15.
Banana		Considering the high wind speed @ 10-24 kmph, provide propping
		to the banana of more than five months old to prevent from
		lodging.

Grapes		June is the best time for pruning in monsoon grape crop. Weak and immature branches should be pruned without damaging in vines.
Gourds	Sowing	With the receipt of anticipated rainfall gourds seeds sowing may be continued with adequate drainage.
Turmeric		Considering the favourable weather apply topdressing to 40 and 60 days old turmeric @ 22 kg urea, 72 kg Potash /acre
Animal Husbandry		Due to high wind speed, feed material of poultries may drift. Hanging of gunny bags along the borders is advised to reduce the wind speed. Provide adequate cool drinking water to all the animals to prevent thirst for water due to high wind speed. Considering high relative humidity, prevent mastitis disease in milch animals by washing the udder with potassium permanganate solution before and after milking.

SMS advisory:

➤ With the receipt of anticipated rainfall gourds seeds sowing may be continued with adequate drainage.
