SMS Advisory	Chances of Moderate rain during 16, 17, 18 & 19 May .Maximum temperature would be in the range of 34°C to 38°C and the minimum temperature would be between 24°C - 28°C. Cloudy sky will appear for the next five days. Wind is expected with the speed of 8-14 Kmph from, Northeast, Southeast, South & Southwest directions.
---------------------	--

General Advisory:

Heavy rain is likely to occur at isolated places over the district during 17, 18 & 19 May 2024. Farmers are advised to act swiftly to repair the water channels, farm ponds and other water bodies to harvest the rain water. During these days farmers are advised to avoid irrigation, inter-cultural operations and application of plant protection measures to the standing crops, provide adequate drainage facilities in the fields to avoid water stagnation due to heavy rainfall, do not allow the animals to grazing outside, standing near the trees or electric poles & provide safe shelter

Thunderstorms & lightning with light to Moderate rain are likely to occur at one or two places over the Tamilnadu during 15 to 19 May 2024. Gusty Wind with a speed of 30 to 50 kmph is expected for the same days. Hence farmers are advised to provide propping in sugarcane and to provide adequate support for crops like Banana, Papaya, Guava and Moringa, to prevent from

provide adequate support. Do not allow the animals to graze outside, standing near the trees, and don't tie the animals to electric poles. Provide safe shelter.

Rainfall occurred in a few places during the past few days, and rain is also forecasted for the coming days, farmers are advised to start summer plough work to increase the capacity of the soil to absorb the rainwater and by overturning the soil, the sharp rays of sun enters the soil and kills the eggs, larvae, and pupae of soil-borne insects and pests.

Weather Based Agro-Advisories: (Bhendi, Black gram & Animal Husbandry).

Bhendi:

The incense of Red cotton bug noticed in Bhendi. Infested seeds become discoloured and shrivelled.

To manage this, conserve the biocontrol agent *Harpactorcostalis predaceous* on nymphs and adults and spray *Beaveria Bassiana* @ 600ml per acre.

Black gram:

Foliar spray of TNAU Pulse Wonder @ 2 kg/acre in 200 litres of water at flower initiation stage decreases flower shedding, increases yield and moisture stress tolerance. in summer black gram

Animal Husbandry:

Provide B-Complex liquid supplementation through drinking water to poultry birds to combat heat stress.

Farmers are advised to reduce the number of birds in a unit area of poultry shed to overcome the heat stress.
