Agro Advisory

Crop	Stage	Advisory
General		Since temperature is increasing, apply mulches to conserve soil moisture. Summer ploughing is also beneficial.

		Raising of green manure crops like daincha, sunnhemp and kolinji can be done to utilizing the summer rainfall.
		Summer ploughing can be done by utilizing the rainfall expected upcoming days and to control weeds and larva of insects.
Cattle	Cow	Animals transitioning from cooler to hotter climates should be restricted from venturing outside during peak heat hours. It is essential to ensure they have access to abundant water.

SMS advisory

Since temperature is increasing, apply mulches to conserve soil moisture. Summer ploughing is also beneficial.
