The Editor,
Sir,

I request that the following message may kindly be published in your esteemed daily:

TNAU conducted Cultivating Careers in Controlled Agriculture

A special skill training program on Greenhouse construction and crop cultivation is being organized by Department of Soil and Water Conservation Engineering, Agricultural Engineering College and Research Institute, Tamil Nadu Agricultural University, Coimbatore through the TNSDC Vetri Nichayam scheme under Naan Mudhalvan Finishing Schools from 30.10.2025 to 28.11.2025. Greenhouse cultivation is becoming increasingly important in today's agricultural scenario due to changing climatic conditions, shrinking land resources, and the growing demand for high-quality produce. Experts provided guidance on greenhouse setup, climate Control, selection of construction materials, irrigation systems, crop management, pest and disease control, year-round production, efficient resource use, quality and export potential, sustainability and food security and marketing strategies. The training was guided by Dr. A. Raviraj, Dean (Engg.), AEC & RI and Dr. Balaji Kannan, Professor & Head, Department of SWCE. The training was coordinated by Dr. K. Arunadevi, Assistant Professor, Department of SWCE. The training was frequently monitored by the District Training Officer Mrs. Lalitha, TNSDC. The participants received a Training Certificate from TNSDC upon completion of training program. It can significantly help the participants to secure government subsidies and financial assistance programs designed to support new enterprises in modern agriculture. This month-long, intensive, skill-based training provided guidance on entrepreneurship and employment opportunities in the field of protected cultivation.
