To
The Editor,
Sir,

Date: 27.10.2026

I request that the following message may kindly be published in your esteemed daily:

TNAU students Excel at Aquasub Engineering Internship

TNAU B.Tech. students excel at Aquasub Engineering Internship. Aquasub Engineering (Aqua Group) hosted the completion ceremony for 10 third-year B.Tech. Energy and Environmental Engineering students from the Agricultural Engineering College and Research Institute (AEC&RI), TNAU. Dr. P. Rajkumar, Dean, AEC&RI motivated the students to equip industrial internship, and the program was mentored by Dr. R. Mahendiran, Professor, Renewable Energy Engineering.

The intensive 10-day hands-on industrial training program successfully concluded at the company's Unit 2 facility. During the certificate distribution ceremony, key company officials highlighted critical manufacturing and engineering takeaways. Mr. V. A. Sureshkumar (Senior Manager – Marketing & Program Coordinator) detailed the strategic workflows behind producing the prominent Texmo and Aquatex brands cater primarily to the Indian market, while atx brand is positioned to serve international markets.

Concurrently, Mr. T. Thirumeny (GM – Manufacturing) and Mr. Senthil Bharathi (Assistant Manager) oriented the students on large-scale plant energy consumption, sustainability metrics, and industrial energy audit practices. The collaborative curriculum effectively bridged the gap between academic theory and technical field application. Through direct exposure to core pump and motor manufacturing workflows, assembly line logistics, and real-world carbon footprint mitigation methodologies, the students gained essential technical insights to drive future sustainable energy and environmental practices within the manufacturing sector.
